SUCCESSOR TO R. W. KELLY

1947 RETAIL PRICE LIST - CACTI AND SUCCULENTS

On August 20, 1946 we purchased the nursery stock and equipment of R.W. Kelly. Since then the wholesale end of the business has required most of our time. This is the first opportunity we have had to make up a complete and up-to-date retail price list. Many of you have written requesting catalogs. We waited to answer your requests until this price list was ready to mail to you. We are returning the money and stamps which many of you sent with your requests since this price list is free of charge.

Thank you for the many requests for catalogs and for the orders we have received from you. We hope to serve you in the future as Mr. Kelly has served you in the past.

P.S. Mr. Kelly has retired and tells us he is enjoying touring the country in a trailer and the hunting and fishing that he is doing along the way.

CACTI

- ACANTHOCALYCIUM violaceum - Brownish spines; violet flowers .35, flowering size .50 and .75
- ACANTHOCEREUS colombianus - Specimen plants 1.00 and 2.00
- " hondurensis - Specimen plants 1.00 and 2.00
- " horridus - Specimen plants 1.00 and 2.00
- " maculatus - 3 angled stems, brownish color dotted with grey spots .50, 1.00 and 2.00
- " pentagonus - Specimen plants 1.00 and 2.00
- " pentagonus var. hondurensis - Specimen plants 1.00 and 2.00
- ANCISTROCACTUS Scheeri - Flowers yellow .30
- APOROCACTUS flagelliformis - The "Rat Tail Cactus" .35. Specimen plants .75
- ARTHROCEREUS mirabilis - Long tubed flowers. Seedlings .50
- ASTROPHYTUM capricorno aurea - Has yellow spines on the older plants. Small .40 larger specimens 1.75 and 1.00
- " myriostigma coahuilensis - Flowering size 1.00
- " columnaris - Tallest of all .50. Flowering size .75 and 1.00
- " potosina - The "Bishop's Cap". Nice seedlings .35 flowering size .75 and up.
- " tanaulipensis - Flowering size 1.00
- " tetragona - Usually four angled. Flowering size 1.00
- " ornatum - "Star Cactus". Yellowish brown spines .35, larger .75 and 1.00
- BERGEROCACTUS Emeryi - Specimen plants .75
- BINGHAMIA chosicensis - Yellow spines .50
- BORZICACTUS aurivillus - .50 and 1.00
- " Humboldtii - Seedlings .35
- CARNEGIEA gigantea - "Arizona Giant Cactus". Seedlings .35
- CEPHALOCEREUS Dybowskii - Specimen plants 2.00
- " melanostele - White, woolly .30
- " Palmeri - .50, .75 and 1.00
- " senilis - "Old Man Cactus". Pur white bristly hair .25 abd .35
- CEREUS hybrid seedlings for grafting stock 3 to 4 inches in height 1.00 per 10 plants, one plant .15
- " monstrosus hybrids - A monstrose form making odd irregular growths. Small .25, larger .50, specimen plants 1.00 and 2.00
- CHAMAEEREUS andalgensis - Specimen plants .50
- " Silvestrii - "The Peanut Cactus" .25, clusters .35
- CLEISTOCACTUS - A slender columnar type
- " aureispinus - .35
- " Baumanii - "Scarlet Bugler" .25, larger .35, specimen plants .50
- " Herzogianus - Rare 1.50
- " smaragdiflorus - Flower tipped with green 1.00
- " Strausii - "Silver Torch". Erect showy plants with bristly spines .25, specimen plants 1.00
- " tupizensis - Specimen plants 1.50
- CONSOLEA rubescens - Grows tree-like with chocolate brown pads nearly spineless .35

- CORRYOCACTUS melanotrichus - From the high Andes. Specimen plants 1.00
- CORYPHANTHA. Globular or cylindric type, particularly well adapted to pot culture.
- " bumama - Round tubercles, flowers yellow .25
 - " cornifera - Tubercles somewhat overlapping like a pine cone, flowers yellow .50
 - " ochinoides - Small growing, flowers rose-colored .25
 - " erecta - Grows taller, branching at base. Specimen plants .50 and 1.00
 - " Georgii - Purplish body when young. Yellow flowers .35
 - " pallida - Short thick tubercles, flowers yellow .50
 - " scolymoides - From Central Mexico .35
- DENDROCEREUS nudiflorus - Fine specimens 1.00
- DENMOZA erythrocephala - Globular when small, with age forms tall "barrel type"
- Seedlings .35
- ECHINOCACTUS. Sturdy "Barrel Cactus"
- " Grusonii - "The Golden Barrel". Specimen plants 1.00. Prices on large show specimens quoted on request.
- ECHINOCEBUS. The "Hedgehog Cactus".
- " Blankii - Slender trailing stems, flowers purple .25, specimen plants .75
 - " cristata - .50
 - " Boyce-Thompsonii - .25
 - " cinerascens. - Ash colored spines, flowers purple .30
 - " inermis - .25
 - " Knippelianus - Blackish green nearly spineless stems, flowers pink .40
 - " pacificus - .35
 - " pontalophus - Slender procumbent. Flower purple .35
 - " rigidissimus - Arizona "Rainbow Cactus" .75
 - " Reichenbachii - "Lace Cactus". Large pink flowers .35
 - " salm-dyckianus - Orange colored flowers which last nearly a week and remain open at night. Rare 1.00
 - " Scheeri - Slender with long tubed flowers of deep pink, also stays open at night .35
 - " subinermis - Specimen plants .50
 - " species nova - From Sonora, Mexico. Grows in small clusters, flowers yellow .50
- ECHINOPSIS of "EASTER LILY CACTUS". Flowers extremely large. Easiest of all cactus to grow.
- " calochlora - Shiny golden green color. Flower white .35, larger .50, specimen plants 1.00
 - " Eyriesii - Sturdy with very short spines and white fragrant flowers .25 larger .35, flowering size .75
 - " Huottii - Short columnar type from Bolivia. Flowers large, white in center pink outside .25
 - " multiplex - Producing large pink, fragrant flowers throughout summer. Small plants .25, larger .50
 - " Silvestrii - Globular with whitish spines .40, larger .60
 - " hybrid ducer - Flower pink .35, flowering size 1.75
 - " "Heavenly Twins" hybrid - Bears large double pink flowers .50, flowering size 1.00
 - " hybrid makla - Free flowering with medium size orchid pink blossoms .35 flowering size 1.75
 - " "Rosca" hybrid - Dark green with rose pink flowers .50
 - " hybrid splendor - large pink flowers shading paler toward center .35 flowering size 1.00
- EPITHELANTHA micromeris - "Button Cactus". Smallest of all cacti. 25
- ERIOCEBUS Bonplandii - Fastest growing and most robust of all, also largest flowers .25, specimen plants 1.00
- " Guelichii - Flowers pink tinged, fragrant .35, specimen plants 1.00
 - " Jusbertii - Specimen plants 1.50
 - " Martinii - Profuse bloomer .25, specimen plants 1.00
 - " pomonensis - Rare one from Argentina .50
 - " Regolii - Flowers deeply tinged with pink .35
 - " tortuosus - Has stouter heavily armed branches .35
- ESCOBARIA Chaffoyi - Seedlings .35
- " durispina - White spined .25
 - " strobiliformis - Seedlings .40
- ESPOSTOA lanata - "Snow Ball Cactus". Plant covered with pure white wool .25, larger .75
- FACHEIROA Blossfeldiana - Seedlings .30

- FEROCACTUS** - "Barrel Cactus" are globular or elongated after great age, heavily armed with attractive spines.
- " *acanthodes* - "California Fire Barrel". Small .50, five inch specimens .75
 - " Large exhibition specimens on request. Seedlings .25
 - " *alamosanus* - Spines reddish, fast growing .50, specimen plants 1.00
 - " *horridus* - .50
 - " *rectispinus* - .50 and 1.00
 - " *Stainesii* - Pretty Mexican species .35, specimen plants .75
 - " *viridoscens* - Native to California. Colorful reddish spines .35
 - " *Wislizenii* - Sturdy from Arizona. Seedlings .35
- FRAILEA**. "Midget Cacti" - Smallest growing of the cactus family with small yellow flowers.
- " *pumila* - .40
 - " *Schillingiana* - Rare .50
- GYMNOCALYCIUM**. South American cacti, globular or flattened, ribs raised into protuberances, pointed below as in a chin, called "Chin Cactus".
- " *Andraca* - Bright yellow flowers .50
 - " *Anisitsii* - Flowers large white, large .75, smaller .50
 - " *denudatum* - Flowers white or pinkish .50 and .75
 - " *gibbosum* - .50
 - " *Locanum* - .50
 - " *loricatum* - Large, heavy drooping spines .50
 - " *Mihanovichii* - Small growing with dark green body with maroon markings. Odd green flowers .50 and .75
 - " *Quohlianum* - White or pinkish flowers .50
 - " *sagliano* - Large plants 1.00 and up depending on size.
 - " *Urselianum* - .50
 - " *Bruchii* - Dwarf species with harmless gray spines, flowers pink .50
- HAMATOCACTUS** *setispinus*. Easily grown Texas cacti, flower yellow with red center, followed by brilliant red fruits .25, .35 and .50
- HARRISIA** *Brookii* - Small .25 and specimen plants .75
- " *gracilis* - Specimen plants .75
 - " *oriophora* - Specimen plants .75
- HELIOCEREUS** *speciosus*. Erect triangular stems, brilliant scarlet purple tinged wide flowers. Parent of most hybrid *Epiphyllums*. Good pot subject .35, medium .75, flowering size specimens 2.00
- HYLOCEREUS** - Climbing, tropical, shade loving cacti, large white nocturnal flowers. Fast growing.
- " *anguensis* - .75
 - " *calcaratus* - .75
 - " *costaricensis* - .75
 - " *Ocamponis* - .75
 - " *polyrhizus* - .75
 - " *undatus* "Honolulu Queen" - .75
- LEMAIREOCEREUS**. Tall growing tree-like, from Mexico. Make fine attractive specimens.
- " *Boneckei* - "Silver Tip". Grayish green skin with frosted white waxy covering. Short black spines, undulated ribs. Fast growing. Recommended highly. Sturdy plants .50, exhibition specimens 1.00
 - " *chlorocarpus* - Rare .50
 - " *Dumortieri* - Specimen plants 1.00
 - " *euphorbioides* - Specimen plants 1.00
 - " *Godingianus* - Specimen plants 1.00
 - " *Hollianus* - Specimen plants 1.00
 - " *marginatus* - "Pipe Organ". Closely set short spines forms a distinct margin along edges of the broad flattened ribs. Specimen plants 1.00
 - " *pruinosis* - Fast growing four or five angles, later grayish or pruinose in color .25, .35 and .50
 - " *stallatus* - Specimen plants 1.00
- LEUCHTENBERGIA** *principis* - "Agave Cactus". Rare .50
- LOBIVIA**. Genus of small growing plants. Colorful day blooming flowers.
- " *aurea* - Large golden yellow flowers .35, larger .50
 - " *Backebergii* - Light green body, nearly spineless, flower bright carmine .35
 - " *Binghamiana* - Small clustering bright red flowers .25, .50, specimens 1.00
 - " *Drijveriana* var. *aurantiaca* - .50 and specimen plants 1.00
 - " *farnesimensis* var. *nigricans* - .50 and specimen plants 1.00
 - " *Herbichiana* - Fast growing, offsets freely, red flower .50, .75 and 1.00
 - " *Higginsiana* - .50
 - " *longistylis* - .35
 - " *pseudocochensis* - Small clustering harmless spines, flower bright red .50
 - " *rebutioides* - Chocolate brown body, flower citron yellow .75
 - " *rubescens* - Young spines reddish, flower yellow .50, flowering specimens 1.50

- LOPHOCEREUS Gatesii - Specimen plants 1.00
 " Schottii - Four to five angled, bordered on ribs with dark spines .25, .50 and specimen plants 1.00
 " Schottii forma monstrosus - Specimen plants 1.50
 LOPHOPHORA Williamsii - "Dope Cactus". Large flattened gray green ribs dotted with tufts of silky hairs, frequently bears small pink flowers, a "Must Have". Small .50, specimen plants .75
 MACHAEROCEREUS eruca - "Creeping Devil Cactus" - 1.00
 MAIHUENIA Poeppigii - Rare Chilean species .75
 MALACOCARPUS Vorwerckianus - Rarity from Colombia. Flowering specimen plants 1.00

MAMILLARIA

A genus of small growing cacti, low, rounded or elongated, bearing flowers in a circle around the top of the plant, ranging in color through white, yellow, pink, red or magenta. Best adapted to small pot, bowl or indoor culture.

- MAMILLARIA applanata - .25
 " Baumii - Bears unusual yellow flowers .35
 " bocasana - "Powder Puff" covered with white silky hair, bears creamy yellow flowers, forms clumps as it grows older .25, larger .50 specimen clumps 1.00.
 " bocasana inermis - White woolly specimen .50
 " Boeckleriana - "Fish Hook" .35
 " camptotricha - "Bird's Nest". Long, slender bright green tubercles tipped with yellow twisted spines .25, .35, and .50
 " carnea - Dark green body, spines black, flowers flesh colored .35
 " contricirra (magnanima) - .25
 " chionocephala - Globular with whitish dense spines .25 and .50
 " compressa - Tubercles angular and large with long white spines .25
 " crucigera - Covered with dense white spines, four centrals in form of a cross .35 and larger .50
 " decipiens - Small green body making many offsets .50
 " densispina - Yellow spined .50
 " durispina - Heavy brownish spines, flower carmine, a good grower .25
 " elongata - Slender, finger-like stems, short yellow spines, branches freely, flower white star-like .25, .35 and clusters .50
 " elongata var. echinus - .35 and .50
 " erythrosperma (Painteri) - Small clustering plant, hooked spines .25, .50
 " fragilis - Miniature plant .25
 " fragilis var. minima - Smaller than the above .25
 " Haageana - Dense white spines, brown centrals, bears circle of rose-colored flowers around tip .25 and .50
 " Leona - .50
 " Lloydii - Grows into a flattened sphere, spines whitish to brown, flowers pinkish white .25
 " Martinezii - Densely spined with short gray-white spines .25 and .40
 " moiacantha - .25
 " microholia - "Little Sun". Golden radial spines forming dark centrals as it grows .25, .35 and specimen plants .75
 " multiceps - .25
 " nigra - .25
 " Parkinsonii - White spined with brown tipped radials, heads divide as plant grows older forming clumps .50, .75, 1.00. Larger on request
 " perbella - Globular with tiny white spines and pink flowers .25
 " perbella lanata - Similar to above but axils of tubercles are woolly .25
 " plumosa - .50 and specimen clusters 1.00
 " prolifera - Cuban species. Small .25, clusters .50
 " pseudoperbella - "Monkey Face". Resembles M. perbella but heads divide .25
 " rhodantha var. chrysacantha - Stiff grayish-yellow spines, flowers carmine .
 " Saffordii - .25
 " Schmollii - White radial and brown central spine, flowers rose .40
 " sphaerica - Flowers bright yellow and large .50
 " spinosissima - Mass of long, fine spines, flowers scarlet .25 and .50
 " texana - .25
 " Vaupellii - Fine species with bright spines, some orange red, flowers red .25, .50 and specimen plants 1.00
 " Winteriae - Bears largest pink flower of Mamillarias. Rare .75
 " Zahniana - Similar to Winteriae but smaller. Rare .60
 " Zeyeriana - Large growing with dense, longish whitish-gray spines .25

- MELOCACTUS. Barrel type topped with a cephalium from which the flowers and fruits appear. Small plants as offered below have not yet developed this organ.
- " amoenus - Rare .50
 - " intortus - "Turk's Cap". From West Indies. Resembles Echinopsis but body is shaded with green, red and bronze topped with tan and brown spines .40 and .65
- MONVILLEA. Slender upright, having large white night blooming flowers. Closely allied to Cereus.
- " Cavendishii - Free flowering. Seedlings .25
 - " insularis - Native to an island off the coast of Brazil .75
 - " Spogazzinii - Slender gray-green stems with jet black spines. Very attractive .25
- MYRTILLOCACTUS geometrizans - Specimen plants 1.00
- " geometrizans var. cochal - Specimen plants 1.00
- NEOLLOYDIA conidea - .40
- " raphidacantha - Slender, erect, flowers white-yellow .25
- NEOPORTERIA subgibbosa - Interesting Chilean plants .35
- NOTOCACTUS apricus - .25
- " Haselbergii - White spined, red flowered .50
 - " Leninghausii - "Golden Ball". Fine hair-like golden spines .35, .50 and specimen plants 1.00
 - " mammulosus var. pampuanus - .25 and specimen plants .75 and 1.00
 - " Ottonis - "Indian Head". Earliest to flower of Notocactus .35 and specimen plants .75 and 1.00
 - " Schumannianus - Pretty, golden spined .50
 - " scopia - "Silver Ball". Bright silvery spines tipped with red. Small .25, larger .35, flowering size .75 and 1.00
 - " mammulosus var. submammulosus - Flat strong spined, flowers large .25
 - " concinnus var. tabularis - Low with soft creamy yellow spines .35
- OPUNTIA basilaris - "Beaver Tail". Gray-green or reddish color. Large ruffled pink to rose flowers. Stands considerable cold and snow .25
- " cylindrica - .25
 - " elata - "Orange Tuna" .25
 - " orinacea - "Grizzly Bear". California species with long white bristly spines. Large yellowish pink flowers. Quite hardy. Recommended highly .25
 - " fragilis - Hardy all over the U. S. .25
 - " fulgida - .25
 - " galapageia - Rare from Galapagos Islands .35
 - " lagopus - Erect cylindrical stems covered with wool and spines. Rare 1.00
 - " mamillata cristata - "Boxing Glove". Club shaped branches will form crested forms and odd shapes. Small ones .20, larger crested ones .35, giant specimens 1.00
 - " microdasys - "Rabbit Ears". Tufts of short yellow spines in dots regularly distributed .20
 - " microdasys var. alba - A white fuzzy variety .25
 - " monacantha - Small rooted stems .20. Rooted fruits .20
 - " monacantha variegata - "Joseph's Coat". Curiously variegated with patches of red, green and yellow .35
 - " Pontlandii - Rare .30
 - " rufida - Bears reddish tufts of glochids .25
 - " Schickendantzii - Erect thin light green stems .25. Rooted fruits .25
 - " serpentina - Cylindrical, knobby branches twist about in a snaky manner .25
 - " serpentina cristata - Fine crested form of above making odd fan-shaped branches .60
 - " subulata - Small .25, larger .50
 - " Teros - .35
 - " vestita - "Old Man Opuntia" .25, larger .50
 - " vilis - Small plants grow like little branched trees, suitable for bowl or window garden .20
 - " glomerata - "Paper Spine Opuntia". About 1 inch in diameter .45, smaller .25
 - " glomerata var. Turpinii - larger diameter, light green in color .50 and 1.00
- OREOCEREUS Celsianus - "Old Man of the Andes". Colorful spines and long hair. Best in full sun .50, large exhibition specimens 1.00 and 2.00 according to size.
- " fossulatus - Not quite so hairy, branches from base. Taller and faster growing than the former 1.50
 - " Trollii - "Old Man of the Mountains". Reddish spines emerge through dense white wool, hairiest of group. Native to Peru .75
- PARODIA auroispina - "Tom Thumb". Golden hooked spines and flowers .25
- " Maassii - Orange-brown curved spines .30
 - " Stuehmeri - Reddish hooked spines .30

- PERESKIA aculeata - Primitive form of cactus bearing true broad leaves, good grafting stock .25
- PERESKIOPSIS chapistlo - .50
- " Gatesii - .50
- " Porteri - .50
- " velutina - .50
- PILOCEREUS. Columnar often hairy at the growing tips with attractive spine formations. Rarities for the advanced collector.
- " alensis - .75
- " catingicola - From the Brazilian catinga or thorn brush country .75
- " glaucoscons - Blue body with light yellow spines .75
- " glaucochorus - .75
- " Hurstii - .75
- " Palmeri - .75
- " piachyensis - .75
- PYRRHOCACTUS horridus (tuberisulcatus) - From the deserts of Chile. Very rare 1.00
- QUIABENTIA chacoensis - a very rare plant 1.00
- RATHBUNIA alamosensis - .50, larger 1.00
- " Kerberi - .50, larger 1.00
- " sonorensis - .50, larger 1.00
- REBUTIA - "Pigmy Cactus". Tiny South American cacti. Brilliant colored flowers. Suitable for pots and bowls.
- " Fiebrigii - Flowers red, spines white .35
- " minuscula - Bright green body, soft harmless spines, flowers profusely, red .30
- " senilis - White bristly spines, flowers red .35
- " Steinhachii - Dark body, dark red flowers .35
- RHIPSALIS - "Mistletoe Cactus". True epiphytes. Suitable for hanging baskets and shade.
- " cassutha - Slender green branches, tiny cream flowers followed by white, mistletoe-like fruits .25
- " cereuscula - "Popcorn Cactus". Masses of short stems tipped with bristles growing on tips of long pendant branches .40
- " Houlettiana - Flattened stems, deeply cut, flowers cream colored with red eye, fruits red .50
- SELENICEREUS. "Moon Cereus". Slender twining cacti which grow to considerable length. Flower at night. The following prices are for unrooted cuts which grow rapidly and root easily. Or we will root them to order for twenty cents extra.
- " Boeckmannii - .40
- " brevispinus - .50
- " coniflorus - .25
- " Donkelaeri - .75
- " grandiflorus - .40
- " hamatus - .25
- " hondurensis - .75
- " insularis - .75
- " Macdonaldiae - .35
- " mallasonii - .50
- " pseudospinulosus - .40
- " spinulosus, purple flower - .25
- " spinulosus, white flower - .25
- " Urbanianus - .50
- " vagans - .75
- " Worchlei - .50
- STENOCACTUS (Echinofossulocactus). Distinctive with numerous thin wavy ribs and numerous small white, yellow and pink flowers. Sturdy, easily grown.
- " acroacanthus - .75
- " albus - .35
- " coptenogonus - .35
- " Lloydii - .40 and specimen plants .75 and 1.00
- " multicoctatus - .35
- " Vaupelianus - .35
- THELOCACTUS. Globular Mexican cacti. Sturdy, free flowering with quite large flowers.
- " Buekii - Large tubercled brown spined, small ones .35
- " crassiharatus - .35
- " hexaedrophorus - Grayish long spined, flowers white .50
- " nidulans - long stiff lanky spines .75
- " Saueri - Small growing, dense white curved spines .50
- " subterraneus - .50
- " tulensis - .50

- TRICHOCEREUS. Sturdy growing, suited for large gardening effects, large pot plants, extra large white nocturnal flowers. Like full sun, rich soil.
- " argentinensis - Specimen plants .75 and 1.00
 - " Bertramianus - Brilliant golden shiny spines. Sturdy specimens grown out doors in sun 1.00
 - " Bridgesii - Bright green body, grows tall and slender, branches from base .75 and 1.00
 - " calchloria - .35
 - " candicans - .35 and larger .50
 - " chiloensis - An attractive one from Chile .75
 - " coquimbanus - Low growing densely spined 1.00
 - " Knuthianus - Specimen plants 1.00
 - " lamprochlorus - Low growing forming clusters of many stems .35
 - " macrogonus - Fast growing, thick stemmed, used as grafting stock for heavy plants 1.00
 - " Pachanoi - Bright green stems, almost spineless, fast growing 1.00
 - " pasacana - Giant cactus of Argentina. Sturdy, slow growing .50 and 1.00
 - " poco - Brownish gold spines, colorful .50
 - " pusquillo - 1.00
 - " Schickendantzii - Forming low dense clusters, best adapted to pot culture .25, .50 and specimen plants 1.00
 - " Shaferi - Low growing, flowers large white .25, .50 and specimens 1.00
 - " Spachianus - Fast growing. One of the best for grafting stocks .50 and 1.00
 - " thelegonus - Specimen plants 1.00
- WEBEROCEREUS Biolleyi - 1.00
- " tunilla - 1.00
- WEINGARTIA. Globular from the Argentina - Bolivia boundary.
- " Fidaiana - Very rare 1.00
 - " Neumanniana - 1.00
- WERCKLEOCEREUS glaber - .50
- WILCOXIA. Weak slender stems growing from tuberous roots, fine pink or reddish flowers.
- " Schmollii - "Lamb's Tail". Spineless stems covered with soft white wool, bears pink flowers. Very odd .50
 - " viperina - Strongest grower .50
- ZYGOCACTUS truncatus - "Christmas Cactus". Likes shade, rich well-drained soil .50 and specimen plants 1.00

SUCCULENTS

- ADROMISCHUS clavifolius - Small clusters of thick, club-shaped brown spotted leaves .25
- " Cooperi - "Plover Eggs". Similar to above but with longer leaves .35
 - " larger .50
 - " cristatus - Odd plants with short stem covered with tiny red, aerial roots, green leaves wavy at the flattened tip, hence the name .25
 - " festivus - .25
 - " maculatus - Small disc-shaped reddish brown flecked leaves about an inch in diameter .35
- AEONIUM arboreum - Bright green rosettes .25
- " arboreum var. atropurpureum - Like the above except the leaves turn purplish red in full sun .25
 - " Cooperi - A compact bushy type bearing attractive rosettes at tip of each branch .25
 - " haworthii - Similar to A. Cooperi but gray green .25
- AGAVE americana var. variegata - Attractive gray green and yellow striped leaves. Grows large .50
- " sisaliana - .50
 - " victoria-reginae - Small growing with dark green stiff leaves, white striped as it grows older .50
- AGRINICTUS agninum - "Lamb's Tongue". Grey green leaves forming compact clusters. Small .25, larger clumps .50
- ALOE beguinii - Unusual Aloe, resembling a huge Haworthia, numerous narrow leaves dotted with white tips ending in a transparent bristle .25, specimens 1.00
- " brevifolia - Short gray-green leaves with edges toothed with short white spikes, flowers red .25
 - " humilis - A low growing short leaved one .25 and specimen plants .50
 - " humilis var. incurva - A dwarf form, leaves gray-green toothed. Flowers orange-red .35
 - " nobilis - Bright shiny green .25
 - " variegata - "Partridge Breast". Most beautiful of all Aloes. Flowers orange-red. Small plants .25, larger ones .35 and flowering size 1.00

- ANACAMPSE ~~arachnoides~~ - A dwarf form with leaves covered with cobwebby hairs .25
 " ~~rufescens~~ - Similar to the following .25
 " ~~telephiastrum~~ - "Sand Rose". Forms clumps of compressed rosettes, short pointed dark olive-green leaves, pinkish at base, large red flowers .25
 BYRNESIA Weinbergii - "Ghost Plant". A pretty silvery gray rosette .25
 BRYOPHYLLUM "Kelly's Hybrid" - Rapid growing with large colorful flowers .25
 " tubiflora - Tubular brown marked leaves, flowers during the winter months, orange-red flowers .25
 CARRUANTHUS caninus - Leaves toothed like a Faucaria, flowers yellow .35
 CEPHALOPHYLLUM alstonii - Clusters of gray pencil-like leaves, red flowers, winter .35
 " velutium - Long fleshy flexible leaves, forming clusters, bearing yellow flowers .30
 CEROPEGIA Woodii - "Umbrella Flower". Slender drooping stems with heart-shaped leaves, flowers pinkish-brown. For the hanging basket or pot .25
 " debilis - .25
 CHEIRIDOPSIS candidissima - African plant having pairs of white leaves resembling goat's horns. A "must have" for rare collections, small ones .25, large .75
 " pillansii - "Lobster Claws". South African plant .50
 " velutina - .35 and larger .75
 COTYLEDON Barbeyi - .25 and .50
 " orbiculata - .25 and .50
 " orbiculata variegata - .25 and .50
 " papillosa - .25 and .50
 " undulata - fast growing, bears orange-red flowers .25
 CRASSULA arborescens - Gray green leaf edged with red .35
 " argentea "Jade Plant" - .25
 " dejecta - Erect with leaves in four vertical pairs, reddish in full sun .25
 " deltoides "Silver Beads" - Grayish white leaves .25
 " falcata "Aeroplane Plant". Curious gray-green leaves resembling blades of aeroplane propellers, bears scarlet to orange-red flowers .35
 " hemisphaerica - .35
 " imperialis - resembles C. pyramidalis .25
 " lycopodioides - many stemmed clusters of bright green resembling club-moss .5
 " pseudolycopodioides - Dark green .25
 " pyramidalis - Very rare .50
 " rubiflora - .25
 " rubiflora cristata - .25
 " rupestris "Rosary Plant". Gray-green, flat rounded leaves united at base, stems prostrate growing long, suitable for hanging basket .25
 " sp. "Pagoda Plant" - Resembles oriental building .25
 " teres - Thick succulent leaves clasp at base, forming rounded column .50
 " tetragona - Erect shrubby, tree-like. Light green leaves, bare brown stems .5
 CYANOTIS somaliensis - "Pussy Ears". Trailing plant with triangular leaves .25
 DYCKIA sulphurea - Shiny green rosettes of sharp denticulate leaves. Belong to pineapple family .25 and specimen plants 1.00
 ECHEVERIA agavoides hybrid - .25
 " amoena - "Hens and Chickens". Small one with light gray leaves tinged with red .25
 " brandenburgiana - gray-green rosettes .25
 " derenbergii - "Painted Lady". Neat rosettes with attractive short stemmed flower stalks .25 and larger .35
 " Doris Taylor - Green leaves covered with fine white hairs. Attractive .25
 " elegans - Pearly blue-white leaves .25
 " expatriata - A small one .25
 " gilva - Thick yellow-green leaves .25
 " Hoffmannii - large wax-like, light green leaves with wavy edges .50
 " Hoffmannii cristata - .35
 " kewensis - .25
 " metallica - .50
 " microcalyx - .25
 " multicaulis - Much branched one, each branch tipped with rose-like cluster of dark, shiny green and red leaves. Very showy and grows well .25
 " nivatis - Small, sharp-pointed, grey-green leaves tinged with pink .25
 " nodulosa - Tall growing, shrubby type with reddish striped leaves. Very odd .30
 " perbella - Yellow-green meaty leaves .25
 " pulvinata - "Chenille Plant". Small shrub type with light green leaves covered with white hairs, red tipped in winter .25

(Continued on next page)

- ECHINOPHYLLA** - pulviver - Richly colored plush-like leaves .25
 " setosus - Dark green velvety leaf edged with red .25
 " setosa - Bright shiny green leaves covered with fine white hairs. Very attractive. Likes shade .25
 " stolonifera - Thin light green leaves and offsets freely .25
 " turgida - Small tight rosette, leaves tipped with purplish-red. (Ground Roses) .25
- EUPHORBIA**. Mostly native to African deserts, much prized by collectors of rare and unusual plants.
 " abyssinica var. eritrea - Tall growing, not branched in young specimens. Rooted cuts on order .50
 " Bergeri - Many serpentine branches from a central head .75
 " canariensis - .50 and 1.00
 " caput-medusae major - Larger growing form of more irregular habit. Small rooted cuts .35, larger .50
 " cereiformis - Erect, many-ribbed, branches freely .25 and specimen plants .75 and 1.00
 " echinus - Has club-shaped stems with spines .35
 " frankeana - Erect cactoid in appearance .25 and specimen plants .75
 " grandicornis - Three-angled stem with white horny margin along edges and heavy thorns in pairs. Fast growing, branches when older .60 and 1.00
 " inermis - .50 and 1.00
 " ingens - Tall mottled dark green .50 and 1.00
 " hermentiana - .35 and specimen plants 1.00
 " mammillaris - "Corn Cob". Popular and easily grown .25 and specimens .75
 " meloformis - Small globular species .75, larger 1.00
 " obesa - 1.00
 " obesa-tubiglans hybrid - 1.00
 " pentagona - Erect branching bright green stems with yellowish spines .35 and specimen plants .75
 " pseudocactus var. lactea - Four-angled armed with spines of cactus-like form. Rooted cuts .40
 " pseudoglobosa - Clusters of small joints. Rare 1.00
 " resinifera - Four-angled gray-green stems forming clusters. A fast grower and hardy. Single stems .35 and specimen plants 1.00
 " stellaspina - Clavate stems with spines which have a star-like spine growth. Cuts to order only .50
 " splendens - "Crown of Thorns" - .35
 " submammillaris - Low growing and freely branching. Small plants .30
 " Susannae - Small, forms clusters of short stems .75
 " tubiglans - 1.00
- FAUCARIA** Bosscheana - .25
 " hybrids - .25
 " tigrina - "Tiger's Jaws". Curious succulent with thick, juicy leaved edged with harmless tooth-like projections. Forms clusters .25
 " tuberculosa - Attractive roughened leaves .25
- GASTERIA** Armstrongii - Small .25, larger .50 and specimen plants 1.00
 " excelsa - Sturdy compact thick spotted leaves .25
 " hybrids - Curious thick dark green leaves arranged in pairs, dotted with tiny raised pearl-like markings. "Ox Tongue" .25, flowering size .50 and specimen plants 1.00
- GLOTTIPHYLLUM** linguiforme - "Tongue Leaf". Bright green bearing large yellow flowers .25
- GREENOVIA** gracilis - Yellowish green rosettes, forms clusters, from the Canary Islands. Desirable .25
- HAWORTHIA**. Small growing South African plants with clusters of pointed or blunt leaves, forming rosettes. Finest of plants for small containers.
 " altilinea - Light green windowed type .25
 " attenuata - Warty .35
 " bilineata - .50
 " Chalwinii - Dark green, small .35
 " coarctata - Dark green, stiff pointed leaves .25
 " cuspidata - Thick blunt pea-green leaves, surface dotted with transparent spots, grows in clumps .25
 " cymbiformis var. obtusa - Rare 1.00
 " decipiens - .75
 " denticulata - Windowed .25
 " fasciata - .35
 " integra - .75

- HAWORTHIA margaritifera* - "Wart Plant". Dainty rosettes of leaves dotted with white tubercles .25, .50 and .35
- " *minima* - Small, light green, transparent, windowed leaves .50
- " *minima* var. *major* - .75
- " *paradoxa* - .25
- " *radula* - Fine white dots .35
- " *Ryderiana* - .75
- " *tessalata* - Short thick dark colored leaves in three series marked with veins transparent above .30
- " *tessalata* var. *Engleri* - .50
- " *tortuosa* - .50
- " *tortuosa* var. *pseudorigida* - .50
- " *turgida* - Smooth windowed leaves .30
- HEREROA Dyeri* - .25
- " *granulata* - Clusters of long, keeled, roughened, dark green leaves. Flowers yellow .35
- " *Jamesii* - .25
- " *Nelii* - "Elk Horns". Bright green leaves in pairs, curved, flattened and notched at the ends .25
- JUTTADINTERIA korii* - Fleshy light green keeled leaves, flowers yellow .25
- KALANCHOE beharensis* - "Velvet Leaf". Erect with large arrow-shaped leaves covered with brownish felt. Small .25, larger .50
- " *Blossfeltiana* - Small .25, larger .50
- " *figuiredoa* - Scalloped edge from Mozambique - Specimen plants 2.00
- " *pinnatum* - Small .25, larger .50
- " *somaliensis* - Broad notched leaves shaded with red, yellow or orange and green according to season - .25
- " *tomentosa* - "Panda Plant". Silver gray velvety leaves with brown trimmings. Small .25, larger .35
- " *velutina* - Silvery gray velvet leaves .35
- " *Welwitchii* - Purple leaves .50
- KLEINIA articulata* - "Candle Plant". Erect blue-green stems topped by leaves when growing which fall off during the dormant period .25
- " *pendula* - "Inch Worm Plant". Arched creeping stems, roots as it touches the soil. Red flowers .40
- " *repens* - .25
- " *tomentosa* - Short pointed cylindrical leaves of pure white. Very rare .35
- LIPHOPS* sp. "Stone Faces". Very curious small flat topped growths resembling pebbles .25
- MESEMBRYANTHEMUM aureum* - Grows into shrubby mounds, brilliant orange flowers in spring .25
- " *roseum* - .25
- " *Schickii* - .25
- NANANTHUS Jamesii* - Makes clusters of dark green pointed leaves dotted with dark spots .30
- " *Pole-Evansi* - .30
- " *vittatus* - Similar to *N. Jamesii*, smaller leaved .25
- PACHYPHYTUM bracteosum* - Thick rounded whitish gray leaves in rosettes .60
- " *compactum* - "Tower of Jewels". Small rosettes of dark green leaves with grayish-white coating .25
- PACHYVERIA clavifolia* - .35
- " *Clevelandii* - Purplish leaved hybrid .25
- " *Haagii* - .25 and larger .50
- " "Kelly's Hybrid" *clavifolia* - .35
- " *Orpettii* - Striking colors ranging from light pink to dark purple, according to season and age .35
- " *Schiedecki* - .25
- " *Schiedecki* var. *cristata* - Pearl-gray leaves with a bluish cast .25, crests .35
- PLEIOSPILOS Bolusii* - "Living Rock". Large, thick, rounded leaves resembling a pair of greenish brown stones, yellow flower .25, flowering size .75
- " *Nelii* - Smoother and more colorful flowered than above species .25
- " *simulans* - Broader leaves than above, keeled on the lower side. Flowers pale yellow to orange .25, larger branched clusters .50
- " *magnipunctatus* - .35
- PORTULACARIA afra* - Shrubby plants with round shiny small leaves, attractive in small bowls .25
- " *afra variegata* - "Rainbow Bush". Variegated form. Plant stem purplish-red, leaves cream and pale green with a red margin. Worthwhile .25

- RHOMBOPHYLLUM rhomboideum - Gray-green leaves with whitish edges forming tufts of stemless rosettes close to the ground. Flowers yellow .25
- RIMARIA Blackburni - .50
- " gigantea - Rare South African .50
- SANSEVERIA abyssinica hybrids - .50
- SEDUM Adolphii - Low shrubby, thick lemon yellow leaves of colorful appearance .25
- " allantoides - .25
- " altissimum var. latifolium - Gray-green clumping sort .25
- " confusum - Attractive golden green foliage .25
- " divergens - .25
- " guatemalense - "Xmas Cheer". Fast growing densely branched with shiny green, red tipped leaves - .25
- " Morganianum - "The Burro's Tail". Leaves pastel creamy-yellow-green. Good for hanging baskets. Small branched plants .35
- " multiceps - "Baby Joshua Tree". Unique for landscape effects in bowls .25
- " pachyphyllum - Gray-green leaves with pinkish tips .25
- " prealtum - .25
- " reflexum cristata - .35
- " retusum - .25
- " Stahlia - "Boston Bean". Reddish-brown rounded leaves .25
- " Treleasei - Has bluish-green leaves with a trace of pink on tips .25
- SEMPERVIVUM arachnoideum - Cobwebby .25
- " arachnoideum var. Laageri - .35
- " Braunii - Similar to S. arachnoideum but with smaller, darker leaves .25
- " calcareum - Pale gray-green rosette, red tipped leaves edged with white .25
- " tectorum - .25
- STOMATIUM Fulleri - Thick, small toothed leaves, grass-green with pale gray dots forming clumps, blooms at night which is rare among succulents .25
- STAPELIEAE - These plants are members of a most unique plant family.
- CARALLUMA lutea - Yellow starfish -.50
- ECHIDNOPSIS (meaning viper-like) cereiformis - .35
- " cereiformis var. obscura - .35
- EDITHCOLEA grandis - Very rare and distinct 1.00
- HUERFIA atrosanguinea - .40
- " keniensis - .40
- " Schneideriana - .35
- " transmutata - .40
- STAPELIA flavirostris - Large flower with purple and white hairs .50
- " gigantea - "Giant Starfish Flower". One of the largest blossoms in the world is borne by this odd African plant .50
- " grandiflora - 5 to 6 inch purplish-brown hairy flowers .40
- " hirsuta - "Hairy Starfish Flower". .35 and .50
- " Leendertziae - Bears peculiar cup-shaped, large, blackish-purple flowers .50
- " mutabilis - The changeable Stapelia - .35
- " pasadenensis hybrid - .25
- " pulchella - Small mottled stems and flowers .25
- " revoluta - Rare .50
- " Schinzii minor - .25
- " variegata - "Starfish Flower". Short pointed stems with curious leathery flowers mottled brown and yellow. African oddity, very desirable .35
- " verrucosa - Dainty toothed stems and spotted flowers .35

ASSORTMENTS

The following assortments are designed to supply the plantings for (1) persons making up dish gardens and (2) persons wishing to add a new genus or family to their collection. Assortments include 10 plants unless otherwise specified.

CACTI ASSORTMENTS

- CACTUS ASSORTMENT R1- Includes Opuntia and Cereus usually used in dish gardens. \$1.00
- CACTUS ASSORTMENT R2- Consists of Mamillaria, Echinopsis and other bowl types usually found in better bowl and dish gardens. \$2.00
- CACTUS ASSORTMENT R3- Includes Astrophytum, Lobivias, Mamillarias and rarer species used in sale to collector trade. \$2.50
- CACTUS ASSORTMENT R9- Larger and better plants of Assortments R2 and R3. Our selection of the best available varieties. \$3.00
- ASTROPHYTUM ASSORTMENT- Includes large specimen plants of the following: capricorne aurea, ornatum, potosina, columnaris, tamaulipensis, tetragona, coahuilense. \$10.00
- ECHINOPSIS ASSORTMENT- Flowering size named varieties of the "Easter Lily Cactus". 6 plants \$2.00

ECHINOCEREUS ASSORTMENT -A nice assortment of the "Hedgehog Cactus" selected for variety of color in flowers. 6 plants \$2.00
OPUNTIA ASSORTMENT-Includes most of the commoner varieties and a few rarer Opuntias- the common prickly pears of the Southwest. \$2.00
ERIOCIEREUS AND HARRISSIA ASSORTMENT- Interesting night blooming varieties from the Carribean, Argentina and Brazil. 6 plants \$2.00
LOBIVIA ASSORTMENT-An assortment well suited to pot culture. Slow growing with bright day blooming flowers. 6 plants \$3.50
SELENICEREUS AND HYLOCEREUS ASSORTMENT- Beautiful climbing cacti noted for their large night blooming flowers. 6 plants \$2.00
ACANTHOCEREUS AND HELIOCEREUS ASSORTMENT-Combines the night blooming Acanthocereus varieties with the brilliant flowering Heliocereus. 4 plants \$2.00
CLEISTOCACTUS ASSORTMENT- Slender columnar type with bright red diurnal flowers borne profusely along the stem. 5 plants \$5.00

SUCCULENT ASSORTMENTS

SUCCULENT ASSORTMENT R4- A selection of the commoner dish garden varieties. \$2.00
SUCCULENT ASSORTMENT R5- Slower growing and colorful plants for individual pots or dish garden planting. \$2.50
SUCCULENT ASSORTMENT R6- Larger and stronger plants of foregoing 2 assortments. \$3.00
SUCCULENT ASSORTMENT R11- Large specimen size succulents in a colorful assortment selected according to the season of the year. \$5.00
AFRICAN SUCCULENT ASSORTMENT- Selected African plants chosen for variety of form and color. Nice for bowl or dish gardens. \$2.00
CENTRAL AMERICAN ASSORTMENT- A selection of typical plants of Mexico, Central America and the Carribean area. \$2.00
WORLD WIDE ASSORTMENT - A pleasant surprise of exotic plants from Canary Islands, Yucatan, Madagascar, Mexico, Natal, Karroo Desert, etc. \$2.00
ADROMISCHUS ASSORTMENT- An interesting group of small plants, slow growing with interesting variety in leaf color and form. \$2.00
CRASSULA ASSORTMENT NO. 1- Includes the more common Crassula. Good for a start. \$2.00
CRASSULA ASSORTMENT NO. 2 - Selected for their variety of form and contrast in appearance. Slower growing than No. 1. \$2.50
ECHIVERIA ASSORTMENTS- A colorful selection of "Ground Roses" from Mexico and South America. 10 at \$2.00, 15 at \$2.75
EUPHORBIA ASSORTMENT- Cactoid appearing species. Includes "Corm Cob", cereiformis, resinifera, "Medusa-head", etc. \$3.00
HAWORTHIA ASSORTMENT- Includes margaritifera, integra, cymbiformis, etc. \$2.00
PACHYPHYTUM AND PACHYMERIA ASSORTMENT- Lovely thick rounded leafed plants in a variety of colors. Slow growing. \$2.50
SEDUM ASSORTMENT NO. 1- Includes some of the common varieties: "Dwarf Joshua Tree", "Boston Bean", "Giant's Watch Chain", etc. \$2.00
SEDUM ASSORTMENT NO. 2- Includes some of the former and the larger Treleasei, Pachyphyllum, guatemalense, etc. \$2.00
STAPELIA ASSORTMENT- Includes Stapelia, Huernia, and Echidnopsis. \$2.50

SEEDS: Mixed better grade cactus seeds in lithographed packets - .10 per packet.

TERMS: Cash remittance with order - check, bank draft, money order or stams. No C.O.D. Orders for less than \$1.00 must include 25c extra for packing costs. California customers must include 2 1/2% state sales tax.

Any plants which do not reach you in good condition will be replaced free provided we are notified within ten days from date of shipment, otherwise replacements cannot be made.

We suggest that you list a number of alternate selections in case we are out of items of your first choice. If no alternates are listed substitutions of equally desirable plants will be made unless otherwise instructed.
